# Preface

libdbi (<http://libdbi.sourceforge.net>) is a database abstraction layer written in C. It implements a framework that can utilize separate driver libraries for specific database servers. The libdbi-drivers (<http://libdbi-drivers.sourceforge.net>) project provides the drivers necessary to talk to the supported database servers.

This manual provides information about the oracle driver. The manual is intended for programmers who write applications linked against libdbi and who want their applications to work with the oracle driver.

Questions and comments about the Oracle driver should be sent to the libdbi-drivers-devel (<mailto:libdbi-drivers-devel@lists.sourceforge.net>) mailing list. Visit the libdbi-drivers-devel list page (<http://lists.sourceforge.net/lists/listinfo/libdbi-drivers-devel>) to subscribe and for further information. Questions and comments about the libdbi library should be sent to the appropriate libdbi mailing list.

The Oracle driver is maintained by Ashish Ranjan (<mailto:ashishwave@users.sourceforge.net>).
